1. Operate disposal with water until it is empty. **TURN OFF disposal** and run a strong stream of hot water into sink drain, just to the side of disposal, so it does not run directly into disposal. Run water for approximately one minute. Reduce hot water stream to a pencil-width trickle.

2. DO NOT OPEN POD. With disposal **OFF** and water still at a trickle, insert one unopened biodegradable pod completely into the disposal. **TURN ON disposal** and operate for 10 seconds. Cleaning foam may rise into sink, or water at a trickle for about 30 more seconds, then run water on high until all foam goes away.

NOTE: Cleaning cycle is complete when cleaning foam entirely disappears from disposal (approximately 1 to 2 minutes). Use weekly to prevent buildup and odors.

DIRECTIONS:
Rejuvenate™ Disposal Cleaner Pods are designed for use in properly working disposals and **WILL NOT** clear a clogged drain. **READ ENTIRE LABEL BEFORE USING.**

your septic and sewer systems.
Rejuvenate™ Disposal Cleaner Pods are an easy-to-use cleaner with a powerful bio-enzymatic formula that helps break down leftover food waste, leaving behind a wonderful fresh lemon scent. The pods also help clean pipes and are safe for
