control the source of flea infestations, pets should be treated with a product registered for application to animals.

Note: Test inconspicuous sample of flooring or other indoor surfaces for staining before use.

OUTDOORS

To kill box elder bugs, centipedes, millipedes, pillbugs, sowbugs, scorpions, spiders, houseflies and other non-biting flies, Asian beetles, Japanese beetles, stink bugs, spider mites and mosquitoes: Spray insects directly from a distance of 8-12 inches. For use only as an aid in reducing annoyance from these insects. Apply to cracks and crevices in and around doors, window frames, light fixtures, porches, in garages and other places where insects may enter the structure.

Ants[§], ticks (including ticks that may transmit Lyme disease), crickets, fleas and earwigs: For treatment of infestation of these insects in areas where there are weeds or bushy non-crop areas, spray infested areas thoroughly. When treating for ticks, give special attention to areas frequented by pets. For ants, thoroughly wet hills and runways. Fleas, ticks, carpenter ants, harvester ants, pharaoh ants and fire ants must be sprayed directly to be killed.

[§]Argentine, southern, field, Allegheny mound, Florida carpenter, black carpenter, cornfield, honey, pavement, nuisance, harvester

STORAGE AND DISPOSAL

Pesticide Storage: Turn the nozzle to CLOSE position. To prevent leakage, place sprayer in holster. Store this product only in its original container in a secure storage area away from sources of heat or open flame and in an area inaccessible to children and pets. Keep from freezing.

Pesticide Disposal: Do not discard the AccuShot[®] Sprayer. Keep the AccuShot Sprayer for use on Spectracide One-Shot[®] Home Insect Control₂. Nonrefillable container. Do not reuse or refill this container. **If empty:** Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

STOP. READ ENTIRE LABEL BEFORE USE.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION. Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

First Aid

If Swallowed:

- Call a Poison Control Center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not give anything by mouth to an unconscious person.
- Do not induce vomiting unless told to do so by a Poison Control Center or doctor.

Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.

Environmental Hazards

This product is toxic to fish and other aquatic organisms. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

RESTRICTIONS

For use around the home only. Do not use on pets.

Do not allow people or pets to enter treated areas until after spray has dried.

- Do not water the treated area to the point of runoff.
- Do not make applications during rain.
- All outdoor applications must be limited to spot or crack-and-crevice treatments only, except for the following permitted uses:
 1. Treatment to soil or vegetation around structures
 2. Applications to lawns, turf and other vegetation
 3. Applications to building foundations, up to a maximum height of 3 ft. Other than applications to building foundations, all outdoor applications to impervious surfaces such as sidewalks, driveways, patios, porches and structural surfaces (such as windows, doors and eaves) are limited to spot and crack-and-crevice applications only.
- Application is prohibited directly into sewers or drains, or to any area like a gutter where drainage to sewers, storm drains, water bodies or aquatic habitat can occur. Do not allow the product to enter any drain during or after application.

HOW TO USE

HOW TO USE THE ACCUSHOT® SPRAYER

- **Aim toward target site, and away from people and pets.**
- **To improve accuracy, use slider to extend wand.**
- **Press the trigger to spray.**
- **Release the trigger to stop spray.**

After use: **1.** Twist sprayer nozzle completely to CLOSE position. **2.** Secure sprayer tip down in holster. **3.** *Failure to adjust nozzle completely to CLOSE position and properly secure sprayer in holster may result in leakage and damage to property or injury to people or animals.*

Keep reusable AccuShot Sprayer for use with Spectracide One-Shot® Home Insect Control.

To replace batteries: **1.** Use screwdriver to open battery compartment. **2.** Remove used batteries and insert four new AA batteries *in correct positions* as marked per diagram inside of battery compartment. **Never** insert the positive end where the negative end belongs and vice versa. **Always** use a complete set of new batteries of the same type when replacing batteries. **Never** mix alkaline, carbon-zinc or rechargeable batteries. **3.** Securely close battery compartment door. **4.** **Always** follow manufacturer's specifications for use and disposal of batteries.

Additional operating notes: • Do not submerge in water. • Before each use, inspect sprayer carefully, making sure hose is flexible and not kinked, worn or cracked and that all connections are tight. When storing sprayer for prolonged periods, remove batteries.

INDOORS

As a spot or crack-and-crevice treatment to kill **cockroaches, palmetto bugs, ants[§], spider mites, crickets, beetles, houseflies and other non-biting flies, fleas, firebrats, water bugs, silverfish, earwigs, box elder bugs, centipedes, millipedes, stink bugs, pillbugs, sowbugs, ticks, scorpions and spiders**, directly spray insects from a distance of 8-12 inches.

To control* (*for up to 12 months indoors on non-porous surfaces) cockroaches, palmetto bugs, ants** (**excluding pharaoh ants and fire ants), beetles, crickets, firebrats, water bugs, silverfish, box elder bugs, and spiders, spray areas where they are found or normally occur, including dark corners of rooms and closets; cracks and crevices in walls; along and behind baseboards; beneath and behind sinks, stoves, refrigerators and cabinets; and around plumbing and other utility installations. One gallon covers 500 sq ft.

For ants[§], apply to ant trails, around doors and windows and wherever else ants may find entrance. Pharaoh ants and fire ants must be directly sprayed from a distance of 8-12 inches.

[§]Argentine, southern, field, Allegheny mound, Florida carpenter, black carpenter, cornfield, honey, pavement, nuisance, harvester, fire, pharaoh

To kill fleas and ticks, thoroughly treat non-porous surfaces of pet resting quarters; along and behind baseboards, window and door frames; localized areas of floor and floor covering; and nearby cracks and crevices where fleas and ticks may be present. Pet bedding should be replaced with clean, fresh bedding after treating the area. Fleas and ticks must be sprayed directly to be killed. **Do not treat pets with this product.** To

OPERATING INSTRUCTIONS FOR ACCUSHOT® SPRAYER

- 1 Shake well before use.
- 2 Remove cap and replace with reusable AccuShot cap and Sprayer. Make sure sprayer cap is tightly closed before use.
- 3 Twist nozzle to adjust spray from CLOSE to SPRAY or STREAM.
- 4 Slide switch on hose plug counterclockwise to OPEN.
- 5 When priming the sprayer, hold sprayer level to the ground. Sprayer may not prime if it is held at an angle. Once primed, it will spray in any direction.

For use with reusable AccuShot Sprayer from Spectracide One-Shot® Home Insect Control

PRECAUTIONARY STATEMENTS
